Discover a wealth of content written by globally-renowned scholars, researchers, practicing professionals and award-winning authors within the Health Sciences world. Our Online Books collection comprises work that will enhance teaching and research, and provides students with a vast range of reliable, authoritative content – all available to access within your library’s digital resources.

The Health Sciences Online Books collection offers a variety of titles spanning all the major branches of medicine. Featuring core textbooks, handbooks and classic reference titles written by key opinion leaders from around the world, the collection fulfills the needs of medical professionals at every stage of their career.

INCLUSIVE: The collection is suitable for pre- and post-graduate students, junior doctors, professors, researchers, and general practitioners.

RESPECTED: Includes prestigious BMA award winning titles such as Dooley: Sherlock’s Diseases of the Liver and Biliary System 12e, Wren: The Concise Guide to Pediatric Arrhythmias and Goodman: Child and Adolescent Psychiatry 3e.

Including over 1,600 titles with no DRM restrictions, this collection offers a reliable and high-impact route to expand or enhance your digital resources in the Health Sciences.
The collection includes titles in basic sciences such as endocrinology, pathology and immunology, and across all the major medical disciplines including surgery, internal medicine and dermatology.

Features titles written in partnership with leading medical associations including the Union for International Cancer Control (UICC), the Nutrition Society, the British Dietetic Association and the Society of Hospital Medicine.

over 150 new titles and new editions added each year.
