**Advances in Pharmaceutical Technology**, a new book series from Wiley, takes up the drug development story where Wiley-VCH’s successful series *Methods and Principles in Medicinal Chemistry* ends - when a potential new drug molecule has been identified. This new series covers the principles, methods and technologies that the pharmaceutical industry uses to turn that candidate molecule into final drug form: optimising the therapeutic performance of the molecule, designing, characterising and producing the best formulation, testing the drug in clinical trials, and manufacturing the final product. The focus will be on new technologies and methods. Each book will be edited by an internationally-recognised expert in the field who will select, invite, and edit review-style chapters from an international team of active researchers.

**SERIES EDITORS**

- **Dr. Dionysios Douroumis**  
  Senior Lecturer, School of Science, University of Greenwich, UK

- **Prof. Dr. Alfred Fahr**  
  Institute of Pharmaceutical Technology, School of Pharmacy, Friedrich – Schiller University of Jena, Germany

- **Professor Juergen Siepmann**  
  University of Lille, College of Pharmacy, France; Director INSERM U1008; Reviews Editor, Int. J. Pharmaceutics; President of APGI

- **Professor Martin Snowden**  
  Dean of Science, School of Science, University of Greenwich, UK; Chair, Academy of Pharmaceutical Sciences, UK

**PUBLISHING EDITOR**

Rebecca Stubbs

**NEW PROPOSALS**

We invite prospective authors/editors of books to submit proposals for new books on topics covered by the series. Please contact the Publishing Editor to obtain a new book proposal form.

**FORTHCOMING TITLES**

- **Hot-Melt Extrusion: Pharmaceutical Applications**: Dionysios Douroumis. May 2012
- **Drug-Delivery Strategies for Poorly Water Soluble Drugs**: Dionysios Douroumis and Alfred Fahr. July 2013
- **In Vitro Drug Release Testing of Special Dosage Forms**: Nikoletta Fotaki and Sandra Klein. July 2013
