

## FOSSILS AND STRATA

### NOTES FOR AUTHORS

Please consult the editor at an early stage regarding the suitability of the topic, technical requirements, and financing. Final acceptance for publication, however, will not be made until the manuscript has been refereed.

Detailed instructions for the preparations and organisation of manuscripts are available on the Lethaia Foundation and Blackwell Publishing's web pages. These should be followed prior to submission of manuscripts.

These standards are introduced with Fossils and Strata 54, 2008. They are different from those published earlier in the series and incorporate a number of changes. They thus replace previous versions of the guide.

### INSTRUCTIONS TO AUTHORS

**Fossil and Strata** publishes original research papers such as monographs, collections of thematic papers and/or a collection of papers that originated from international conferences. Submitted manuscripts are considered for publication on the understanding that they have not been submitted or accepted for publication elsewhere.

*Manuscripts.* - Manuscripts should be written clearly and concisely and conform to the general style of the monograph series.

All contributions should be written in British (UK) English. Authors who are unfamiliar with English are encouraged to seek help of a competent linguist prior to submission. The author(s) may submit an abstract and captions for illustrations and tables in German and/or French, but the authors are responsible for the accuracy and correctness of text. A list of independent suppliers of editing services can be found at [www.blackwellpublishing.com/bauthor/english\\_language.asp](http://www.blackwellpublishing.com/bauthor/english_language.asp).

Fossils and Strata follows the S1 (Système International d'Unités) units wherever possible.

Fossils and Strata accept monographs with systematic taxonomy and the accuracy of synonymies together with high-quality illustrations are a high priority for the journal. Manuscripts that are inadequately prepared and do not follow the rules of nomenclature will be returned to the author.

*Copyright.* – The Lethaia Foundation owns the copyright to Fossils and Strata and licenses it to Blackwell Publishing Ltd. The authors must declare in writing the transfer of all rights to copyright to the Foundation. The author(s) will receive or should download an Exclusive Licence Form from [www.blackwellpublishing.com/pdf/FandS\\_ELF.pdf](http://www.blackwellpublishing.com/pdf/FandS_ELF.pdf) at the time of acceptance of the manuscript. This must be returned signed, along with the final version of the manuscript.

### SUBMISSION OF MANUSCRIPTS

**Fossils and Strata** accepts printed manuscripts. Thematic or multiple contributions should be submitted electronically including the manuscript, figures and tables.

*Paper submission.* - Two paper copies, including all illustrations and tables, must be submitted, together with all computer-generated files prepared on readable media. For safety, the authors should retain a further copy. Double-space all text.

Send the manuscript to: Fossils and Strata, Dr. Svend Stouge, Geological Museum, Øster Voldgade 5–7, DK-1350 Copenhagen K, Denmark. E-mail: [svends@snm.ku.dk](mailto:svends@snm.ku.dk)

### **MANUSCRIPT PROCESSING**

The initial submitted manuscript is sent to referees. On the basis of the referees' reports, the editor will decide whether to publish the manuscript and the modifications that will be required.

The final version of text, figures and tables should be submitted as computer files or uploaded electronically to Manuscript Central.

The author receives galley proofs and page proofs. The corrected proofs should be returned to the Production Editor. The editor and publisher take no responsibility for errors in the proofs not discovered by the authors.
