DESCRIPTION

Familiarize yourself with the anatomy of ruminants and food animals with this up-to-date guide

Ruminants, the population group of cud-chewers that includes goat, sheep, and cattle, constitute one of the largest groups of food animals on Earth. As populations of food animals grow both across North America and globally, veterinary students and professionals now more than ever require familiarity with ruminant anatomy. There is a critical need for a guide to ruminant anatomy directed at students of veterinary medicine.

*Guide to Ruminant Anatomy* answers this need, providing a richly illustrated guide tailored to the practical needs of veterinary clinicians. Divided for ease of use into sections representing different parts of the ruminant body, this in-depth introduction uses real dissection images to familiarize readers in detail with the internal and external anatomy of caprine, ovine, and bovine animals. It provides an outstanding demonstration of the relevance of anatomy in clinical settings.

*Guide to Ruminant Anatomy* readers will also find:

• Practical clinical applications discussed by board certified clinicians in each chapter

• Line drawings corresponding to dissection images of embalmed specimens

• Learning objectives in each section, tying key concepts to clinician development

• Companion website encompassing laboratory videos demonstrating relevant anatomy by well versed anatomists

*Guide to Ruminant Anatomy* is an essential guide for veterinary students studying anatomy of food animals, as well as veterinary practitioners of all kinds looking for an easy-to-use reference on ruminant anatomy.
ABOUT THE AUTHOR

Mahmoud Mansour, DVM, PhD, is an alumni Professor and course coordinator for large animal anatomy, Department of Anatomy, Physiology and Pharmacology in the College of Veterinary Medicine, Auburn University, Alabama, USA

Joe Rowe, DVM, is Senior Lecturer in the Department of Anatomy, Physiology and Pharmacology, College of Veterinary Medicine, Auburn University, Alabama, USA

Ray Wilhite, PhD, is Coordinator of the Gross Anatomy Lab in the Department of Anatomy, Physiology and Pharmacology in the College of Veterinary Medicine, Auburn University, Alabama, USA

Saly Hafiz, DVM, PhD, Research Assistant and Gross Anatomy Instructor, Department of Anatomy, Physiology and Pharmacology in the College of Veterinary Medicine, Auburn University, Alabama, USA

Contributor

Thomas Passler, DVM, PhD, DACVIM, Clinical Professor of Food and Fiber Animal Medicine, Department of Clinical Sciences in the College of Veterinary Medicine, Auburn University, Alabama, USA.
