Out of stock  
AUD $309.95

### DESCRIPTION

- This book is a comprehensive and up-to-date account of where we stand in immunological strategies for preventing or treating type 1 diabetes (T1D).

- Brings together contributions from the leaders in the arena of clinical immunotherapy, not limited to the diabetes field exclusively, in order to delineate a road-map that would lead to future clinical trials.

- The book integrates information from human and animal studies.

- The book considers T1D within the broader context of autoimmune disease.

- The format contains several discussions, which address specific questions and provides guidelines for future strategies and solutions for discovering a cure.

### ABOUT THE AUTHOR

The [Novartis Foundation](https://www.novartis.com) is an international scientific and educational charity which promotes the study and general knowledge of science and in particular encourages international co-operation in scientific research.
