Barley: Production, Improvement, and Uses
Steven E. Ullrich

**DESCRIPTION**

Barley is one of the world's most important crops with uses ranging from food and feed production, malting and brewing to its use as a model organism in molecular research. The demand and uses of barley continue to grow and there is a need for an up-to-date comprehensive reference that looks at all aspects of the barley crop from taxonomy and morphology through to end use. *Barley* will fill this increasing void. *Barley* will stand as a must have reference for anyone researching, growing, or utilizing this important crop.

**ABOUT THE AUTHOR**

*Steven E. Ullrich* is a Professor of Agronomy in the Department of Crop and Soil Sciences at Washington State University.

**SERIES**

*World Agriculture Series*
