DESCRIPTION

The first authoritative and comprehensive survey of the origins and current state of transhumanist thinking

The rapid pace of emerging technologies is playing an increasingly important role in overcoming fundamental human limitations. Featuring core writings by seminal thinkers in the speculative possibilities of the posthuman condition, essays address key philosophical arguments for and against human enhancement, explore the inevitability of life extension, and consider possible solutions to the growing issues of social and ethical implications and concerns. Edited by the internationally acclaimed founders of the philosophy and social movement of transhumanism, *The Transhumanist Reader* is an indispensable guide to our current state of knowledge of the quest to expand the frontiers of human nature.

ABOUT THE AUTHOR

Max More, PhD is President and CEO of the Alcor Life Extension Foundation, the world's leading cryonics organization. An internationally acclaimed strategic philosopher, Dr. More is recognized for his thinking on the philosophical and cultural implications of emerging technologies.

Natasha Vita-More, PhD is a leading expert on human enhancement and emerging and speculative technologies and is a Professor at the University of Advancing Technology. Dr. Vita-More's writings have appeared in *Technoetic Arts: Journal of Speculative Research*, *Metaverse Creativity* and *The Global Spiral*. She has appeared in numerous televised documentaries on media design, culture, and the future.
