Cochrane Handbook for Systematic Reviews of Interventions, 2nd Edition

Julian P. T. Higgins (Editor), James Thomas (Editor), Jacqueline Chandler (Associate Editor), Miranda Cumpston (Associate Editor), Tianjing Li (Associate Editor), Matthew J. Page (Associate Editor), Vivian A. Welch (Associate Editor)

DESCRIPTION

The revised edition of the Handbook offers the only guide on how to conduct, report and maintain a Cochrane Review

The second edition of The Cochrane Handbook for Systematic Reviews of Interventions contains essential guidance for preparing and maintaining Cochrane Reviews of the effects of health interventions. Designed to be an accessible resource, the Handbook will also be of interest to anyone undertaking systematic reviews of interventions outside Cochrane, and many of the principles and methods presented are appropriate for systematic reviews addressing research questions other than effects of interventions.

This fully updated edition contains extensive new material on systematic review methods addressing a wide-range of topics including network meta-analysis, equity, complex interventions, narrative synthesis, and automation. Also new to this edition, integrated throughout the Handbook, is the set of standards Cochrane expects its reviews to meet.

Written for review authors, editors, trainers and others with an interest in Cochrane Reviews, the second edition of The Cochrane Handbook for Systematic Reviews of Interventions continues to offer an invaluable resource for understanding the role of systematic reviews, critically appraising health research studies and conducting reviews.
ABOUT THE AUTHOR

**Julian P. T. Higgins** is Professor of Evidence Synthesis at Bristol Medical School, University of Bristol, UK. He has worked in methods for systematic review and meta-analysis for over 25 years and acts as Senior Methods Advisor to Cochrane.

**James Thomas** is Professor of Social Research and Policy at the EPPI-Centre, UCL Institute of Education. He has broad interests in systematic review methodology and tools and is Director of the Systematic Reviews Facility for the Department of Health, England.
