Integration of Mechanical and Manufacturing Engineering with IoT: A Digital Transformation
R. Rajasekar (Editor), C. Moganapriya (Editor), M. Harikrishna Kumar (Editor), P. Sathish Kumar (Editor)

| Hardcover | 978-1-119-86500-1 | April 2023 | £148.00 |

**DESCRIPTION**

*Integration of Mechanical and Manufacturing Engineering with IoT* has been written by renowned experts in the field of mechanical and automation engineering with over five years of experience in implementation of IoT for mechanical applications. It provides detailed chapters including evolution of Internet of Things, Industry 4.0 and several applications of IoT in the field of mechanical engineering. It is packed with reference tables and schematic diagrams for the most commonly used processes and techniques.

**ABOUT THE AUTHOR**

**R. Rajasekar** Professor and Head of the Department of Mechanical Engineering, Kongu Engineering College (An Autonomous Institution under Anna University), Tamilnadu, India. He obtained his PhD from the Indian Institute of Technology, Kharagpur, and specializes in material science and engineering, renewable energy, surface coating on solar cells, and tribological performance of carbide inserts. He has published more than 100 research articles in reputed international journals as well as more than 30 book chapters.
C. Moganpriya is an associate professor in the Department of Mechanical Engineering, Kongu Engineering College (An Autonomous Institution under Anna University), Tamilnadu, India. She completed Ph D in 2019 and her current research area includes surface engineering of solar cells for performance enhancement of power conversion efficiency and tribological performance of cutting tool insert by adopting several hard coating materials. She has published 13 research articles and 15 book chapters with international publishers.

P. Sathish Kumar, PhD is an assistant professor in the Department of Manufacturing, Institute of Mechanical Engineering, Saveetha School of Engineering, SIMATS University, Chennai, Tamilnadu, India. He has published more than 60 research articles and 35 book chapters with international journals and publishers. His main research areas are in tribological studies of mining bits, thin film coating, natural fibee composites and renewable energy.

M. Harikrishna Kumar, PhD is a lecturer in Sri Krishna Polytechnic College, Coimbatore, India. He has 12 years of teaching and 2 years of industry experience. He served as an assistant professor in Kongu Engineering College, Perundurai, India for 9 years.
