The Epidemiology of Diabetes Mellitus, 2nd Edition
Jean Marie Ekoé (Editor), Marian Rewers (Co-Editor), Rhys Williams (Co-Editor), Paul Zimmet (Co-Editor)

Hardcover  ISBN: 978-0-470-01727-2  October 2008  $333.00

DESCRIPTION

The first edition of this book gained recognition as the definitive textbook of diabetes epidemiology. The second edition builds on this success, gathering recent information on international trends and data for diabetes mellitus. In particular, the book highlights the dramatic rise of Type 2 diabetes in children, adolescents and the elderly throughout the world. One new section features prevention and screening of both Type 1 and Type 2 diabetes. Other new chapters cover the epidemiology of obesity and the impact of nutrition, and review available guidelines for better worldwide glycemic control. Future challenges, including the effects of antipsychotic treatment and HIV infection and therapy on diabetes, are also addressed. All chapters have been completely revised and updated, covering:

• definitions, classification and risk factors for diabetes

• new evidence for screening and prevention of Type 1 and Type 2 diabetes

• epidemiology of complications and associated risk factors

• economic aspects: the direct and indirect costs of diabetes.

*The Epidemiology of Diabetes Mellitus* fills the need for a current compendium of diabetes epidemiology in the tradition of the first monumental text of the late Kelly West. It is essential reading for general practitioners, diabetologists, clinical endocrinologists, cardiologists, epidemiologists, nurses, dieticians, and other diabetes care providers, as well as health care decision makers.
ABOUT THE AUTHOR

Professor Jean-Marie Ekoe. Endocrinologie, Metabolism et Nutrition, Centre de Recherche CHUM, Canada.

Professor Marian Rewers. MD, PhD, Professor, Pediatrics & Preventive Medicine, Clinical Director, Barbara Davis Center for Childhood Diabetes, University of Colorado, School of Medicine, USA.
