

Chromatographic Methods in Clinical Chemistry and Toxicology

Roger Bertholf (Editor), Ruth Winecker (Editor)

E-Book	978-0-470-02310-5	January 2007		\$178.99
Hardcover	978-0-470-02309-9	February 2007	<i>Out of stock</i>	\$222.50
O-Book	978-0-470-02312-9	February 2007		Available on Wiley Online Library

DESCRIPTION

This book aims to fill the gap that exists between theoretical treatments of chromatography, and clinical chemistry and toxicology texts, which focus almost exclusively on clinical relevance and applications. Chromatography has a vast array of clinical applications, and though the chromatographic methods were first introduced decades ago, new applications of this technology are being used to explore previously inaccessible frontiers in clinical diagnostics and toxicological testing. An up-to-date book devoted to clinical and toxicological applications of chromatographic methods will serve as an instructional and reference text, useful to students, laboratory technicians, and researchers.

ABOUT THE AUTHOR

Professor R.L. Bertholf, Associate Professor and Director of Clinical Chemistry and Toxicology, Department of Pathology, University of Florida Health Science Center, Jacksonville, FL, USA.

Dr R.E. Winecker, Chief Toxicologist, North Carolina Office of the Chief Medical Examiner.
