In order to deliver excellent service quality, it is critical to understand, create and deliver real value to all stakeholders. The second edition of Services Marketing Management has been thoroughly revised and restructured to provide the students with an overview of services marketing from this clear strategic orientation.

It is built around five core guiding principles:

- Market orientation
- Assets and capabilities
- Characteristics of services
- Internationalization
- Value concept

With numerous examples that illustrate key points in the text, Services Marketing Management, 2nd Edition begins by embracing services marketing management in both a national and international context, including the latest developments, then outlines the wide variety of assets and strategic capabilities required to deliver services and create superior value for customers.
“This is a welcome second edition, firmly establishing it as a leading international text on strategic services marketing. Though completely revised, it retains the unique focus of the original on care for the individual and the understanding, creation and delivery of value to customers, with the authors bringing their topic vividly to life through numerous international examples. Clearly written and logically structured, it will be an invaluable resource for services marketing and management courses at all levels.”
