DESCRIPTION

This book addresses the problems and brings solutions to the security issues of ad-hoc networks. Topics included are threat attacks and vulnerabilities, basic cryptography mechanisms, authentication, secure routing, firewalls, security policy management, and future developments.

An Instructor Support FTP site is available from the Wiley editorial board.

ABOUT THE AUTHOR

FAROOQ ANJUM, PhD, is a senior scientist at Telcordia Technologies. He is also an adjunct professor at both the University of Pennsylvania and Stevens Institute of Technology. His research focuses on problems in diverse areas such as security in computer networks, wireless technologies, middleware, and next generation networks.

PETROS MOUCHTARIS, PhD, leads Telcordia's research department in information assurance and security, including security for wireless ad hoc networks.
