Immunotoxicology Strategies for Pharmaceutical Safety Assessment
Danuta J. Herzyk (Editor), Jeanine L. Bussiere (Editor)

DESCRIPTION

• An important reference which provides an overview of the current and recently introduced methodologies for testing the immunotoxic risks in drug candidates

• Helps readers understand the significance of the methods and approaches to immunotoxicology testing

• Aids drug scientists in industry and regulatory areas to consolidate approaches to immunotox testing

• Offers a definitive assessment of nonclinical models to study the toxic impacts (bio)pharmaceuticals can have on the immune system

• Includes chapter authors from across the pharma industry, bringing a real-world and applied perspective to immunotox testing

ABOUT THE AUTHOR

DANUTA J. HERZYK, PHD, is the Senior Scientific Director in the Safety Assessment Department of Merck Research Laboratories. She previously worked in immunologic toxicology for GlaxoSmithKline. A member of the Society of Toxicology, Drug Information Association, and American Association of Immunologists, Dr. Herzyk has published over forty articles. She serves on the editorial board of Perspectives in Experimental and Clinical Immunotoxicology.
JEANINE L. BUSSIERE, PHD, is an Executive Director of Toxicology at Amgen. She is the author or coauthor of eight book chapters and approximately fifty articles. She is on the editorial board of Journal of Immunotoxicology. Dr. Bussiere is a member of the Society of Toxicology, American College of Toxicology, and Drug Information Association.
