DESCRIPTION

The Fourth Edition of this well-received text on the principles of geographic information systems (GIS) continues the author's style of "straight talk" in its presentation and is written to be accessible and easy to follow. Unlike most other GIS texts, this book covers GIS design and modeling, reflecting the belief that modeling and analysis are at the heart of GIS. This approach helps students understand and use GIS technology.

ABOUT THE AUTHOR

Michael N. DeMers is an Associate Professor of Geography at New Mexico State University. He holds a BS and MS from University of North Dakota, and a Ph.D from University of Kansas.

NEW TO EDITION

New introductory chapter, Spatial Learner's Permit makes this text even more accessible to students without GIS backgrounds.

FEATURES

Explicit learning objectives at the beginning of each chapter detail precisely what students will be expected to know, allowing professors to create lesson plans and strategies to match.
