Inorganic Syntheses, Volume 24
Jean'ne M. Shreeve (Editor-in-Chief)

DESCRIPTION

The volumes in this continuing series provide a compilation of current techniques and ideas in inorganic synthetic chemistry. Includes inorganic polymer syntheses and preparation of important inorganic solids, syntheses used in the development of pharmacologically active inorganic compounds, small-molecule coordination complexes, and related compounds. Also contains valuable information on transition organometallic compounds including species with metal-metal cluster molecules. All syntheses presented here have been tested.

ABOUT THE AUTHOR

Jean'ne Marie Shreeve is an American chemist known for her studies of fluorine compounds and explosives. She has held her namesake professorship at the University of Idaho since 2004.
