Gene Therapy Immunology
Roland W. Herzog (Editor)

Hardcover  978-0-470-13406-1  December 2008  Out of stock  $174.75

DESCRIPTION

• Summarises and reviews the important field of genetic therapy with respect to the latest immunological advances in the lab and clinic

• Unique treatment of immunology and immunotherapy in gene - approached from a vector and target organ point of view rather than from the perspective a specific diseases

• Broad appeal - applicable for immunology and genetics / gene therapy, recombinant DNA studies, transplantation, virology, cancer research and tumor research

ABOUT THE AUTHOR

Roland W. Herzog, Ph.D., is Associate Professor of Pediatrics at the University of Florida in Alachua, Florida. Dr. Herzog is a regular presenter at the annual American Society for Gene Therapy meeting, and his popular course on the topic of immunology and gene therapy is the basis for this exciting new book.
