Focused Operations Management shows how to do much more with existing resources in terms of throughput, response time and quality. It provides a system view and will touch upon performance measures, operations management, quality, cost-accounting, pricing, and above all, value creation and value enhancement.

ABOUT THE AUTHOR

BOAZ RONEN is a Professor of Technology Management and Value Creation at Tel Aviv University. He has consulted to numerous corporations, organizations, and government agencies worldwide. He has been a visiting professor at several high-profile business schools, including Columbia University, New York University, and SDA-Bocconi Graduate School of Business Administration in Italy. He is also the coauthor of Focused Operations Management for Health Services Organizations, from Jossey-Bass.

SHIMEON PASS is a noted expert on applying the philosophy and tools of the Focused Management methodology and the Theory of Constraints (TOC) in high-technology, industrial, service, retail, and nonprofit organizations. As an executive at IBM, he specialized in the implementation of advanced managerial methods to enterprise information systems. He specializes in applying Focused Management and TOC practices in the management of research and development organizations and project
management. His papers on value creation and performance improvement have been published in leading practice and academic journals.

NEW TO EDITION

• Covers the use of methods such as the Theory of Constraints (TOC) that yield fast results.

• Demonstrates how simple tools like the Focusing Table, the Focusing Matrix, the Complete Kit concept and applications of the Pareto Analysis can increase throughput, reduce response time and create value.

• The methods described in the book are valuable for business organizations as well as nonprofit organizations. The methods are common-sense based, are applicable for both large and small organizations, and for managers of all levels.
