Geology of Carbonate Reservoirs: The Identification, Description and Characterization of Hydrocarbon Reservoirs in Carbonate Rocks

Wayne M. Ahr

Hardcover ISBN: 978-0-470-16491-4 August 2008 $120.50

DESCRIPTION

• An accessible resource, covering the fundamentals of carbonate reservoir engineering

• Includes discussions on how, where and why carbonate are formed, plus reviews of basic sedimentological and stratigraphic principles to explain carbonate platform characteristics and stratigraphic relationships

• Offers a new, genetic classification of carbonate porosity that is especially useful in predicting spatial distribution of pore networks.

ABOUT THE AUTHOR

Wayne M. Ahr, PhD, is a professor in the Department of Geology and Geophysics with a joint appointment in the Department of Petroleum Engineering at Texas A&M University. Dr. Ahr has published 150 technical papers and abstracts. He is a Certified Petroleum Geologist and a member of the American Association of Petroleum Geologists, where he serves as Associate Editor. He is also a member of the Society for Sedimentary Geology and the Society of Petrophysicists and Well Log Analysts; is a lifetime member of the Fulbright Association; and serves on the editorial board of the Geological Journal.
