Plasmid Biopharmaceuticals: Basics, Applications, and Manufacturing
Duarte Miguel F. Prazeres

Hardcover ISBN: 978-0-470-23292-7  August 2011  $177.75

DESCRIPTION

The book addresses the basics, applications, and manufacturing of plasmid biopharmaceuticals. The survey of the most relevant characteristics of plasmids provides the basics for designing plasmid products (applications) and processes (manufacturing). Key features that the authors include in the book are: i) consistency and clear line of direction, ii) an extensive use of cross-referencing between the individual chapters, iii) a rational integration of chapters, iv) appellative figures, tables and schemes, and v) an updated, but selected choice of references, with a focus on key papers.

ABOUT THE AUTHOR

Duarte Miguel F. Prazeres, PhD, DSc, is Associate Professor at the Instituto Superior Técnico (IST) and Senior Researcher at the Instituto de Biotecnologia e Bioengenharia, both within the Universidade Técnica de Lisboa. Dr. Prazeres has published 140 peer-reviewed articles and fifteen book chapters on such topics as biocatalysis, downstream processing, and nanobiotechnology.
