This book is designed to start with simple examples that progressively develop the reader's confidence to take on more complex tasks. There is very little theoretical discussion about computer science, operations research algorithms, mathematics, or finance. The thrust of the book is to teach the reader to break complex tasks down into simple tasks. It then looks to implement those simple tasks into VBA code using a critical subset of the features of the language.

ABOUT THE AUTHOR

William Preinitz is a Managing Director with Citigroup Global Markets’ Global Special Situations Group. He oversees new business origination-structured finance issuance, serv-icing operations, rating agency relationships, credit wrap providers, investors, analytical development, internal risk control, audit activities, hedging, and residual arbitrage activities.

FEATURES

• A concise, immediate, and practical guide to developing a meaningful level of modeling expertise on problems in structured finance

• Teaches how to break complex tasks down into simple tasks and then implement them into VBA code using a critical subset of the features of the language
