This book focuses on efficacy, toxicity, drug interactions, and abnormal clinical laboratory tests resulting from the use of herbal remedies. Although a few herbal remedies are safe and have efficacy (for example saw palmetto), many herbal remedies are toxic. This book guides in the interpretation of abnormal test results in otherwise healthy subjects due to use of herbal remedies. Chapters focus on interactions between herbals and pharmaceuticals, sources of contamination in herbal supplements, and analytical techniques used in the investigation of herbal remedies.

**ABOUT THE AUTHOR**

**Amitava Dasgupta** is a Professor in the Department of Pathology and Laboratory Medicine at the University of Texas Medical School at Houston and the director of clinical chemistry, toxicology, and point of care testing at the Memorial Hermann Hospital, the main teaching hospital of the medical school.
