DESCRIPTION

*Computer Education for Teachers: Integrating Technology into Classroom Teaching* is designed to introduce future teachers to computer technology in a meaningful, practical fashion. It is written for undergraduate and graduate students who want an up-to-date, readable, practical, concise introduction to computers for teachers.

ABOUT THE AUTHOR

Vicki Sharp is a best-selling author of over 30 books. Her Ed Tech book is currently the number 3 book in this market. She teaches at California State University-Northridge with experience teaching in elementary school. She received her Ph.D. in Quantitative Research from St. Louis University and a Bachelor of Arts degree from Washington University. She teaches math/science methods courses and computer courses and supervises student teachers. She serves as a computer consultant and trainer for software publishers and school districts in Southern California. She speaks at computer conventions such as *Computer User Educators* (CUE) and *The National Education Computing Conference* (NECC). She is currently a member of the Educational Advisory Board for Knowledge Adventurer, one of the top publishers of educational software. Her special interests are integrating the computer into the classroom, teacher education, and school improvement.
