Age Estimation in the Living: The Practitioner's Guide

Sue Black (Editor), Anil Aggrawal (Editor), Jason Payne-James (Editor)

**DESCRIPTION**

This book summarizes and explains the main approaches to age estimation in the living, defining when a parameter may be of use and raising awareness of its limitations. This text ensures that practitioners recognize when an assessment is beyond their area of expertise or beyond verification depending upon the clinical data available. Each key approach to age evaluation has been allotted a single chapter, written by an international leader in the particular field. The book also includes summary chapters that relay readily accessible data for use by the practitioner, and includes important “ageing milestones.”

This book is indispensable where problems of immigration and legal standing, juvenile vs. adult criminal status, and responsibilities of law enforcement to protect vulnerable persons are key issues on a daily basis. Medical practitioners, forensic practitioners such as pathology, odontology, anthropology and nursing, lawyers, and police would find this book incredibly useful.

**ABOUT THE AUTHOR**

Professor Sue Black, OBE BSc PhD DSc FRSE, Head of Anatomy and Forensic Anthropology, College of Life Sciences, University of Dundee, Scotland, UK

Professor Sue Black is one of the worlds leading experts in Forensic Anthropology. She has received many accolades throughout her distinguished professional career including an OBE presented by Her Britannic Majesty for services to Forensic Anthropology
