DESCRIPTION

Population growth and food supply have long been of central concern to economists. The World Food Economy examines the lessons of the past while assessing 21st century and future challenges, including food shortages, global hunger, and economic inequality. With the demand for food and the population growing at an unprecedented rate, this text provides students with a timely, relevant, and unique overview of the world of agricultural production. New coverage in the Second Edition explains how productivity has risen around the globe throughout the last century through technological advances and how consumers and producers in every part of the world—rich and poor alike—feel the effects of expanded global commodity trade, food aid, and national legislation in response to globalization.

ABOUT THE AUTHOR

Douglas D. Southgate, Jr. is a Professor of agricultural economics at Ohio State University, where he also has directed the International studies Center and the Latin American Studies Program. He was awarded a bachelor's degree in economics by the University of Oregon in 1974 and was elected to Phi Beta Kappa. He completed his Ph.D. in agricultural economics at the University of Wisconsin, in 1980, and the same year joined the faculty at Ohio State. He was promoted to associate professor in 1986 and to full professor in 1995.
