Highly Commended at the BMA Medical Book Awards 2015

*Mann's Pharmacovigilance* is the definitive reference for the science of detection, assessment, understanding and prevention of the adverse effects of medicines, including vaccines and biologics.

Pharmacovigilance is increasingly important in improving drug safety for patients and reducing risk within the practice of pharmaceutical medicine. This new third edition covers the regulatory basis and the practice of pharmacovigilance and spontaneous adverse event reporting throughout the world. It examines signal detection and analysis, including the use of population-based databases and pharmacoepidemiological methodologies to proactively monitor for and assess safety signals. It includes chapters on drug safety practice in specific organ classes, special populations and special products, and new developments in the field.

From an international team of expert editors and contributors, *Mann’s Pharmacovigilance* is a reference for everyone working within pharmaceutical companies, contract research organisations and medicine regulatory agencies, and for all researchers and students of pharmaceutical medicine.

The book has been renamed in honor of Professor Ronald Mann, whose vision and leadership brought the first two editions into being, and who dedicated his long career to improving the safety and safe use of medicines.
ABOUT THE AUTHOR

Elizabeth B. Andrews PhD, MPH, FISPE, Vice President, Pharmacoepidemiology and Risk Management, RTI Health Solutions, Research Triangle Park, NC, USA

Nicholas Moore MD, PhD, FRCP(Edin), FISPE, Professor of Clinical Pharmacology, Service Hospitalo-Universitaire de Pharmacologie, Bordeaux, France
