DESCRIPTION

This unique book will help psychiatrists to understand better the risks of cardiovascular illness and cardiologists to appreciate possible pathophysiological links with psychiatric conditions. It describes the common psychiatric conditions, their key features and how they may influence cardiovascular disease, outcomes, and quality of life. It also considers the cardiovascular complications that may arise as a result of mental illness.

In an exciting, collaborative approach, psychiatrists and cardiologists combine their expertise throughout the book to provide guidance on the best way to manage such patients, considering the patient as a whole, not the individual conditions.

ABOUT THE AUTHOR

Michelle Riba M.D. is Professor of Psychiatry and Associate Chair for Integrated Medicine and Psychiatric Services at the Department of Psychiatry, University of Michigan. She is also Associate Director, Michigan Institute for Clinical and Health Research (MICHR); Director, PsychOncology Program, University of Michigan Comprehensive Cancer Center; Associate Director, University of Michigan Comprehensive Depression Center; Past President, American Psychiatric Association and Secretary for Scientific Publications, World Psychiatric Association.
Lawson Wulsin M.D. is Professor of Psychiatry and Family Medicine at the University of Cincinnati. His special area of interest is physical and mental health; he is the author of "Treating the Aching Heart: A Guide to Depression, Stress, and Heart Disease".

Melvyn Rubenfire M.D. is Professor of Internal Medicine and Director of Preventive Cardiology at the University of Michigan. In 2009 the University named a Professorship in his honor, the Melvyn Rubenfire Professorship in Preventive Cardiology, in recognition of his contribution to patient care, research and education in preventive cardiology.
