The five steps to more intelligent decision making are:

- **Step 1:** More intelligent strategies # by identifying strategic priorities and agreeing your real information needs

- **Step 2:** More intelligent data # by creating relevant and meaningful performance indicators and qualitative management information linked back to your strategic information needs
- **Step 3:** More intelligent insights # by using good evidence to test and prove ideas and by analysing the data to gain robust and reliable insights
- **Step 4:** More intelligent communication # by creating informative and engaging management information packs and dashboards that provide the essential information, packaged in an easy-to-read way
- **Step 5:** More intelligent decision making # by fostering an evidence-based culture of turning information into actionable knowledge and real decisions
