DESCRIPTION

Part of The Geological Field Guide Series, Basic Geological Mapping, 5th Edition is an essential basic guide to field techniques in mapping geology. Now completely revised and updated the book retains the concise clarity which has made it an indispensable instant reference in its previous editions. It provides the reader with all the necessary practical information and techniques that they will need while carrying out work in the field, covering a wide spectrum of different conditions, needs and types of countries. This edition covers new developments in technology including Google Earth and the use of GPS. This is an ideal field guide to geological mapping for 2nd/3rd year undergraduates of Geology, Hydrogeology and Geological Engineering.

ABOUT THE AUTHOR

Richard J. Lisle is a professor at the School of Earth and Ocean Studies, Cardiff University, and his research interests include: Fault-slip analysis, Strain analysis, Fracture Prediction, Numerical modeling.

Peter Brabham is a senior lecturer at Cardiff University, his research interests include: Seismic Exploration; Environmental & Engineering Geophysics; South Wales Coalfield - Geology and Industrial development; Landscape Visualization.
