Prepared under the aegis of the Food and Agriculture Organization of the United Nations (FAO), this text presents a fresh and comprehensive look at agricultural development policy. It provides a clear, systematic review of important classes of policy issues in developing countries and discusses the emerging international consensus on viable approaches to the issues.

The text is unique in its coverage and depth and it:

- Summarises hundreds of references on agricultural development policies
- Cites policy experiences and applied studies in more than 70 countries
- Provides guidance for policy makers giving examples of successes and failures
- Reviews issues related to the formulation of strategies and the requirements for making them successful
- Develops the conceptual foundations and illustrates policies that have worked, and some that have not, with explanations

Topics covered include agriculture’s role in economic development, the objectives and strategies of agricultural policy, linkages between macroeconomic and agricultural policy, policies for the agricultural financial system and agricultural technology development.

Upper level undergraduates taking courses in Economic Development and International Development and graduates taking courses in Agricultural Development, International and Economic Development, Natural Resource Management and specialised topics in
agriculture will find this text of great interest. It also serves as a reference for professionals and researchers in the field of International Development.
