Biomineralization is a hot topic in the area of materials, and this volume in the *Metals Ions in Life Sciences* series takes a systematic approach, dealing with all aspects from the fundamentals to applications. Key biological features of biomineralization, such as gene directed growth and the role of enzymes are covered, as are new areas, including copper/zinc in the jaws of invertebrates or magnetic biomaterials that help birds with navigation.

### ABOUT THE AUTHOR

**Mrs. Astrid Sigel**, Prof. Helmut Sigel and, c/o Dept. of Chemistry, Inorganic Chemistry, University of Basel, Spitalstrasse 51, CH-4056 Basel, Switzerland

**Professor Roland K. O. Sigel**, Institute of Inorganic Chemistry, University of Zurich, Winterthurerstrasse 190, CH-8057 Zurich, Switzerland
