**DESCRIPTION**

- Shows Java developers everything they need to know to build Java database applications with MySQL.

- Takes a hands-on, code-intensive approach in which readers will learn how to build a sophisticated Web database management application.

- Begins with a review of the fundamentals of MySQL.

- Explains using Java's JDBC with MySQL, as well as servlet and JSP programming with MySQL.

- Provides a code-rich tutorial on how to build the sample Java database application using EJBs.

- The companion Web site provides the full code examples plus links to useful sites.

**ABOUT THE AUTHOR**

**MARK MATTHEWS** is the creator of Connector/J and its predecessor MM.MySQL, the Java JDBC drivers for MySQL. He is the undisputed authority on developing Java database applications with MySQL.

**JIM COLE** is a senior software engineer specializing in Internet and knowledge management systems. He is an active developer, working in Java, C++, and MySQL.
JOSEPH D. GRADECKI is a senior software engineer working on enterprise-level securities processing systems. He has built numerous dynamic, enterprise applications using Java, MySQL, servlets, JSPs, Resin, XML, and more.
