DESCRIPTION

You have decided that your business needs to outsource its IT requirements - this book will now show you how!

The outsourcing of IT is currently a "hot topic" internationally and yet guidebooks on how, rather than whether or not to implement this difficult process are rare despite the serious consequences of mistakes: the costs of switching back to an in-house operation are emotionally and financially high. The IT Outsourcing Guide provides invaluable, practical advice to both guide the novice and inform the veteran on how to effectively navigate through the IT outsourcing minefield once they have decided this is the route their business needs to take. The approach suggested is top-down and leads from business goals through contracting to ongoing management, with contributions from key employees of large international companies such as: Commonwealth Bank, Royal & Sun Alliance, Booz.Allen & Hamilton, PA Consulting and IDG.

Pioneering in the field as one of the first texts on how to implement IT outsourcing, this is a valuable resource for anyone involved in any part or stage of the information technology outsourcing process.

ABOUT THE AUTHOR

ROB AALDERS has held senior strategic and line management positions in a variety of companies in Europe, Australia and Asia during 25 years in the IT industry. His strength lies in his ability to devise strategic plans for organisations and to define how they should be implemented.
Aalders has carried out assignments for multinational and governmental agencies including Australia Post, QANTAS, the National Rail Corporation and the Hong Kong Transport Department and has gained line management experience, mostly in the transportation sector, which gives a business focus and practical orientation to his strategic studies.

PA Consulting Group is a leading management, systems and technology consulting firm, with a unique combination of these capabilities. Established almost 60 years ago, and operating worldwide from over 40 offices in more than 20 countries, PA draws on the knowledge and experience of some 3,700 people, whose skills span the initial generation of ideas and insights all the way through to detailed implementation.

PA works with clients to improve performance, mobilise human resources and deliver change effectively, including managing major projects, and designing and implementing enterprise-wide systems and full e-business solutions.

We are proud that our clients say, "PA makes it happen."
