Signal Analysis: Time, Frequency, Scale, and Structure
Ronald L. Allen, Duncan Mills

E-Book 978-0-471-66036-1 June 2004 $137.99
Hardcover 978-0-471-23441-8 January 2004 $171.50
O-Book 978-0-471-66037-8 May 2004 Available on Wiley Online Library

DESCRIPTION

- Offers a well-rounded, mathematical approach to problems in signal interpretation using the latest time, frequency, and mixed-domain methods
- Equally useful as a reference, an up-to-date review, a learning tool, and a resource for signal analysis techniques
- Provides a gradual introduction to the mathematics so that the less mathematically adept reader will not be overwhelmed with instant hard analysis
- Covers Hilbert spaces, complex analysis, distributions, random signals, analog Fourier transforms, and more

ABOUT THE AUTHOR

RONALD L. ALLEN received his BA in mathematics from the University of California, Berkeley in 1973, his MA in mathematics from the University of California, Los Angeles in 1975, and his MS and PhD in Computer Science from the University of Texas at Arlington in 1990 and 1993, respectively.
DUNCAN W. MILLS received his BA in Physics from Wesleyan University, his MS in Electrical Engineering from George Washington University, and his PhD in Electrical Engineering from University of Texas at Dallas in 1992.
