DESCRIPTION

This is one of the first books to focus on the dynamic aspect of proteomes. The book introduces proteomics to the newcomer, reviews the theoretical aspects of proteomics and its state-of-the-art technologies, along with a number of biological applications using "classical" proteomic technology. The book also presents a new concept, the Dynamome, or the expression of a comprehensive molecular set that participates in the whole dynamic process of a series of cellular events.

ABOUT THE AUTHOR

Nobuhiro Takahashi, PhD, is a Professor of Applied Biological Science in the Department of Agriculture at Tokyo University of Agriculture and Technology.

Toshiaki Isobe, PhD, is a Professor of Biochemistry in the Department of Chemistry at Tokyo Metropolitan University.

SERIES

Wiley Series on Mass Spectrometry
