**DESCRIPTION**

*Phishing and Counter-Measures* discusses how and why phishing is a threat, and presents effective countermeasures. Showing you how phishing attacks have been mounting over the years, how to detect and prevent current as well as future attacks, this text focuses on corporations who supply the resources used by attackers. The authors subsequently deliberate on what action the government can take to respond to this situation and compare adequate versus inadequate countermeasures.

**ABOUT THE AUTHOR**

**MARKUS JAKOBSSON**, PhD, is Associate Professor in the School of Informatics at Indiana University, where he is also Associate Director of the Center for Applied Cybersecurity Research. Dr. Jakobsson is the former editor of *RSA CryptoBytes*. He is a noted authority on the subject of phishing and is regularly invited to speak on the topic at conferences and workshops.

**STEVEN MYERS**, PhD, is Assistant Professor in the School of Informatics at Indiana University and a member of the University's Center for Applied Cybersecurity Research. Dr. Myers worked on secure email anti-phishing technology at Echoworx Corporation, and has written several papers on cryptography, distributed systems, and probabilistic combinatorics.
