**DESCRIPTION**

*Bayesian Methods in Finance* provides a detailed overview of the theory of Bayesian methods and explains their real-world applications to financial modeling. While the principles and concepts explained throughout the book can be used in financial modeling and decision making in general, the authors focus on portfolio management and market risk management—since these are the areas in finance where Bayesian methods have had the greatest penetration to date.

**ABOUT THE AUTHOR**

Svetlozar T. Rachev, PhD, Doctor of Science, is Chair-Professor at the University of Karlsruhe in the School of Economics and Business Engineering; Professor Emeritus at the University of California, Santa Barbara; and Chief-Scientist of FinAnalytica Inc.

John S. J. Hsu, PhD, is Professor of Statistics and Applied Probability at the University of California, Santa Barbara.

Biliana S. Bagasheva, PhD, has research interests in the areas of risk management, portfolio construction, Bayesian methods, and financial econometrics. Currently, she is a consultant in London.
Frank J. Fabozzi, PhD, CFA, is Professor in the Practice of Finance and Becton Fellow at Yale University's School of Management and the Editor of the Journal of Portfolio Management.

NEW TO EDITION

- **Explains and illustrates the foundations of Bayesian analysis oriented to participants in the finance market.** The use of Bayesian methods leads to better portfolio selection and estimation risk. It also provides a very versatile framework to incorporate the prior views of a fund manager into the asset allocation process, and help users to decide on which explanatory variables to include in a model, through Bayesian variable selection techniques.

- **Provides applications to leading asset management models such as the Black-Litterman model and fundamental factor models.**

- **Provides applications to corporate finance.** Includes real options, capital budgeting, dividend payout policy.
