Drugs are being developed to alleviate the symptoms of dementia and different models of care are being tried. This book is a reference work in the subject. It gives a basis of the disease, its epidemiology, care implications, development and use of drugs. It discusses the challenges of obtaining reliable data and reviews the tools used to assess the costs of dementia to date. It also deals with the pharmacoconomics of dementia.

ABOUT THE AUTHOR

Anders Wimo was born in 1952. He's Adjunct Professor in the Department of Neurobiology, care sciences and society at the Karolinska Institutet, Stockholm, Sweden since 2007 and a Family physician in Bergsjo (Halsingland), Sweden since 1991.
