DESCRIPTION

This ground-breaking volume sets out an original model of the dynamics of language processing, which can be used to explain the structural properties of language in a simple and elegant way. The model is introduced both informally and formally, and is applied to a range of languages.

ABOUT THE AUTHOR

Ruth Kempson is Leverhulme Research Professor of Linguistics at the Department of Philosophy, King's College London. She is editor of Mental Representations (1988) and Deduction and Language (1995).

Wilfried Meyer-Viol is Lecturer in the Department of Philosophy at King's College London. He is a logician with a background in psychology who has published on cognitive psychology and on classical, intuitionistic and modal logic.

Dov Gabbay is Professor of Computer Science at King's College London. He is one of the world's foremost authorities on non-classical logics and their applications in computing. He has published over 170 papers and books on this subject, and initiated several currently active research areas in logic and computation.
FEATURES

• Sets out an original model of language processing to explain the structural properties of language.

• Re-opens the debate on basic methodological assumptions of linguistic theory.

• Written by leading figures in the fields of linguistics and logic.
