DESCRIPTION

This introductory textbook for supervisors and students of clothing and fashion sets out the fundamentals of work study, effective supervision, training, balancing, layouts, fault prevention and other basic information needed by those working in the clothing manufacturing industry. This second edition has been updated to incorporate the changes that have occurred since the first edition was published seven years ago. Greater emphasis has been placed on production planning and control, and total quality management, both important factors for ensuring a profitable operation.

ABOUT THE AUTHOR

A.J. Chuter BSc, BSc (Eng), C Eng, C text, is a fellow of the Institute of Electrical Engineers, the Textile Institute, the Institute of Quality Assurance, the Clothing and footwear Institute and the Association of Quality Management Consultants.
