DESCRIPTION

This perennial bestseller is an ideal introductions to epidemiology in health care. The fifth edition retains the book's simplicity and brevity, at the same time providing the reader with the core elements of epidemiology needed in health care practice and research. The text has been revised throughout, with new examples introduced to bring the book right up to date.

ABOUT THE AUTHOR

David James Purslove Barker CBE was an English physician and epidemiologist and originator of the Barker Hypothesis that foetal and early infant conditions have a permanent conditioning effect on the body's metabolism and chronic conditions later in life.
