**DESCRIPTION**

Most individuals were never formally taught thinking skills and, as a result, are using processes that were developed during childhood to reach decisions and solve problems. Thus, in an era of knowledge explosion, organizational performance accountability, and rapid change caused by technology, leaders and managers are trying to succeed using thinking patterns developed before they were twelve years old. *Power Thinking* offers leaders the information they need to evaluate their current thinking proficiencies, determine areas for improvement, and enhance their thinking skills. The book includes the Yale Assessment of Thinking, a standardized assessment measure that enables readers to determine their abilities in the cognitive domains found to be crucial to being an outstanding leader.

**ABOUT THE AUTHOR**

**John N. Mangieri** is president of the Center for Leadership and Personnel Development in Charlotte, North Carolina. He has served as faculty member and university administrator at a number of institutions, where he has held a variety of positions including university president. A Fulbright Scholar, Mangieri has consulted to and conducted leadership programs at numerous organizations in the United States and countries around the world.

**Cathy Collins Block** is a professor of education at Texas Christian University and has been a visiting professor at the University of Notre Dame. She was the chairperson of the National Commission to Infuse Thinking Development into the Curriculum of the
Schools of the United States. Block has been honored by being named one of the 2,000 Most Outstanding Scholars of the 21st Century.

Mangieri and Block have jointly written seven books as well as a standardized test, the Yale Assessment of Thinking, published by Jossey-Bass.
