DESCRIPTION

Implant and Regenerative Therapy in Dentistry provides a uniquely clear, precise guide to decision making in a variety of clinical situations, from the treatment planning phases to the actual execution of the procedure. It offers concrete and useful decision criteria for various treatment options, as well as equipping readers with key problem-solving and critical apparatus.

Implant and Regenerative Therapy in Dentistry anchors itself in the realities of clinical practice. Replete with decision-making algorithms, it acts as both a reference and a daily companion to its readers, conveying information succinctly, thoroughly and accessibly. Its team of authors, gathered together under the leadership of an exceptional editor, create a book unique in its elegant simplicity and its day-to-day usefulness.

ABOUT THE AUTHOR

Paul A. Fugazzotto is in full-time clinical practice specializing in periodontics and implant therapy. In addition to maintaining his practice, he has published and lectured extensively on the topics of implant dentistry and regenerative therapies.
