Description

Focused attention on how to organize and conduct research can increase the efficiency of the research process and its outcomes. The second edition of Research Methodology in Applied Economics provides time-tested guidelines to instruct graduate students in the research process.

Emphasizing research methodology as it applies to economics, Ethridge provides (1) an overview of the conceptual and philosophical basis of research methodology and (2) procedural guidelines on designing, coordinating, and conducting research projects. This textbook integrates philosophies, concepts, and procedures in research methodology, adding practical tips such as how to write a research proposal, how to apply for funding, and how to write reports that effectively present research. This edition updates and increases the use of relevant examples for today’s students, faculty, and researchers.

About the Author

Don E. Ethridge, Ph.D., is chairman and professor, Department of Agricultural and Applied Economics, Texas Tech University, Lubbock. He has been a student of research methodology for many years and has extensive experience conducting all types of economic research.
