The Pathology of Congenital Heart Disease: A Personal Experience With More Than 6,300 Congenitally Malformed Hearts, 2 Volume Set
Saroja Bharati, Maurice Lev

DESCRIPTION

Drs. Bharati and Lev share the knowledge they've accumulated through the study of the pathology of congenital heart disease as seen in this century. Their detailed studies of over 6,300 congenitally malformed hearts give them a unique and comprehensive perspective on this topic. This monograph reports the results of their analyses and includes 2,700 excellent photographs. This book will be of significant interest to those working with or studying about congenital heart disease. This book will help clinicians and surgeons to diagnose congenital heart disease. Likewise, it offers protocol for correcting the lesions, nonsurgically and surgically. Concurrently, the text offers fertile ground for selective basic science specialties: genetics, immunology and molecular biology. Epidemiologists, statisticians and computer experts will want to review this book.

ABOUT THE AUTHOR

Saroja Bharati and Maurice Lev are the authors of The Pathology of Congenital Heart Disease: A Personal Experience With More Than 6,300 Congenitally Malformed Hearts, 2 Volume Set, published by Wiley.
