Polymer Physics: From Suspensions to Nanocomposites and Beyond
Leszek A. Utracki (Editor), Alexander M. Jamieson (Editor)

DESCRIPTION

Providing a comprehensive review of the state-of-the-art advanced research in the field, Polymer Physics explores the interrelationships among polymer structure, morphology, and physical and mechanical behavior. Featuring contributions from renowned experts, the book covers the basics of important areas in polymer physics while projecting into the future, making it a valuable resource for students and chemists, chemical engineers, materials scientists, and polymer scientists as well as professionals in related industries.

ABOUT THE AUTHOR

LESZEK A. UTRACKI, PhD, is a Senior Research Officer at the National Research Council of Canada, Industrial Materials Institute, and a former adjunct professor at McGill University, Department of Chemical Engineering, in Montreal, Quebec. He is the author or editor of twenty-one books and has written forty-eight book chapters, hundreds of referenced and non-referenced journal articles, and meeting proceedings.

ALEXANDER M. JAMIESON, PhD, is Professor of Macromolecular Science and Engineering at Case Western Reserve University in Cleveland, Ohio. He has written hundreds of articles in referenced journals and three book chapters.
