DESCRIPTION

Based on their own experiences of in-depth case studies of software projects in international corporations, in this book the authors present detailed practical guidelines on the preparation, conduct, design and reporting of case studies of software engineering. This is the first software engineering specific book on the case study research method.

ABOUT THE AUTHOR

Dr. Austen Rainer is a Senior Lecturer in the School of Computer Science at the University of Hertfordshire. He is an active member of the Centre for Empirical Software Process Research (CESPR) and teaches several courses in the BSc(Hons) and MSc degree programs.

Dr. Per Runeson is leader of the Software Engineering Research Group at Lund University, as well as Research Director for EASE - Embedded Applications Software Engineering. He is a Senior Researcher at Sony Ericsson, where he fulfills his role as a verification advisor. His research focuses on efficient verification and validation processes.

Dr. Martin Höst is Director of the M.Sc. Programme in Computer Science and Engineering at Lund University and a member of the Software Engineering Research Group (SERG).
Dr. Björn Regnell is a professor of Software Engineering at Lund University's Department of Computer Science and Vice Dean of Research at the Faculty of Engineering, LTH. His research interests include market-driven software development, requirements engineering, software quality, software innovation, software product management, and empirical research methods.
