• Interventions for infants and toddlers at risk; comprehensive treatment models for children and youth with ASD; targeted interventions for social communication symptoms in preschoolers with ASD; augmentative and alternative communication; interventions for challenging behaviors; supporting mainstream educational success; supporting inclusion education; promoting recreational engagement in children with ASD; social skills interventions; and employment and related services for adults with ASD

• Supporting adult independence in the community for individuals with high functioning ASD; supporting parents, siblings, and grandparents of people with ASD; and evidence-based psychosocial interventions for individuals with ASD
• Special topic coverage such as autism across cultures; autism in the courtroom; alternative treatments; teacher and professional training guidelines; economic aspects of autism; and consideration of alternative treatments
