**DESCRIPTION**

Various systems science and engineering disciplines are covered and challenging new research issues in these disciplines are revealed. They will be extremely valuable for the readers to search for some new research directions and problems.

- Chapters are contributed by world-renowned systems engineers
- Chapters include discussions and conclusions
- Readers can grasp each event holistically without having professional expertise in the field

**ABOUT THE AUTHOR**

*MengChu Zhou* is a Distinguished Professor of Electrical and Computer Engineering at the New Jersey Institute of Technology (NJIT), USA. He is an Associate Editor of IEEE Transactions on Systems, Man, and Cybernetics: Systems, and is a fellow of IEEE, IFAC, and AAAS.
Han-Xiong Li is a Professor in the Department of Systems Science and Engineering and Engineering Management at the City University of Hong Kong, HK. Dr. Li Serves as an Associate Editor of IEEE Transactions on Cybernetics, and IEEE Transactions on Industrial Electronics. He is a Fellow of the IEEE.

Margot Weijnen is a full Professor of Process and Energy Systems Engineering at Delft University of Technology, the Netherlands. She is the founding and Scientific Director of Next Generation Infrastructures and, since 2013, a member of the Netherlands Scientific Council for Government Policy. She is a founding fellow of ISEAM and European editor of the Journal of Critical Infrastructures.

IEEE Press Series on Systems Science and Engineering
