DESCRIPTION

Textbook of Pharmacoepidemiology, Second Edition, provides an introduction to pharmacoepidemiology and the data sources, methods and applications used in clinical research, the pharmaceutical industry and regulatory agencies.

Drawing upon the fifth edition of the authoritative reference, Pharmacoepidemiology, this new edition covers the key learning requirements of the discipline. The textbook provides an introduction to pharmacoepidemiology, pharmacoepidemiological data sources, special issues in methodology, special applications and future developments in the field. Updated learning features such as case studies, key points and Suggested Further Reading are included throughout the text.

Textbook of Pharmacoepidemiology is a practical educational resource for upper-level undergraduates, graduate students, post-doctoral fellows in schools of public health, pharmacy and medicine, and for everyone learning and working in pharmacoepidemiology.
